

MultiSwap

Groundbreaking multi collateral
AMM

AMM's are Inflexible

Current AMM's have very little flexibility. They are stuck in version 0. One size does not fit all.

AMM's Leak Value

Current AMM's leak value to arbitrageurs. Why give your money to some unknown third party?

AMM's Cause Losses

Most rug pulls are done with AMM's. With the right architecture, this is easy to fix.

PROBLEM

AMM technology is in the dark ages.

Fix Inflexibility

Bring AMM technology into 2021 and beyond with elegant and groundbreaking features.

Stop Leaking Value

Gain control over arbitrage and keep the profits. Capture protocol level fees for consistent income.

Stop Abuse of AMM's

Eliminate rug pulls and other abusive behaviors. A big plus for defi.

THE UTOPIA

MultiSwap

An elegant and deceptively simple multi collateral AMM with groundbreaking performance and features.

TIMING

AMM Use Exploding

Use of AMM's and pooled assets are exploding. Trading is moving from cefi to defi. All defi protocols need AMM's for farming and other purposes.

Capture Value

Shortcomings in current AMM technology are hurting the defi industry. Much of the value is captured by unrelated third parties.

TVL > 11 Billion

TVL Held in AMM's

2B+ Trade Volume

Daily Trade Volume

Size the Market

11B+ TVL and 2B+ daily trade volume and growing exponentially.

Uniswap

Balancer

Curve

SushiSwap

Indirect Competitors

Competitive Advantages

Advantage 1

Multi Collateral AMM's are superior to single pairs.

Advantage 2

AMM pools can do much more than swap tokens.

Advantage 3

Customizable AMM pools are needed for different apps. One size does not fit all.

Advantage 4

Capture all the value and prevent rug pulls and other nefarious activity.

Competitor Approach

Liquidity Moves Instantaneously

Liquidity flows to new protocols instantaneously if there is a good reason.

Better Returns

Current AMM's leave value on the table.
Capture it for an edge.

Automigrate Liquidity

Automatically migrate liquidity from other protocols to MultiSwap.

Business Model

Protocol Fees, Capital Efficiency, Arbitrage Capture

A .040% protocol fee on swaps (same as Curve) on 1B daily trade = 146M year

Most capital in AMM's is not used. MultiSwap has features to utilize unused capital for derivatives, credit, and other applications.

Build a strong community around the MULTI token.

Future Roadmap

MultiSwap has a very quick path to launch.

1

Launch MULTI Token

Q1 2021

2

Version 1 Launch on Mainnet

Q2 2021

3

Loans and Derivatives

Q3 2020
